INSIGHT & RECOMMENDATIONS :

*SALES & BASKET*

*- R$13.59M item revenue from 98,666 orders and 112,650 items*
*- Average order value is R$137.75*
*- 90% of orders contain a single item (1.14 items per order), so growth depends on winning more orders*
*- 3,095 active sellers earn about R$4,391 each on average*

*DELIVERY*

*- 6.8% of delivered orders were late (6,534 of 96,478)*
*- 93.2% arrived on or before the estimated date*
*- Highest late-delivery state: [MG] at [4.6]% ← see map on Delivery page*
*- Lowest late-delivery state: [AP] at [3]%*
*- Cross-state orders vs same-state: [15] vs [8] days ← see Sellers & Payments page*

*PAYMENTS & FREIGHT*

*- Credit card: 75.4% of orders, 78.3% of payment value*
*- Boleto 19.9%, voucher 3.2%, debit card 1.5% of orders*
*- 66.9% of credit card orders are paid in installments (avg 3.5)*
*- Freight is R$2.25M, equal to 16.6% of item revenue*

*RECOMMENDATIONS*

*1. Manage freight cost: at 16.6% of item revenue it is a visible burden. Find the states and routes with the highest freight per item and test carrier negotiation or free-shipping thresholds there.*
*2. Fix delivery by region: focus carrier and seller follow-up on the states with the highest late rates instead of acting on the 6.8% average.*
*3. Bring sellers closer to customers: if same-state orders deliver faster and cost less freight, recruit sellers in under-served states.*
*4. Protect installment options: most credit card orders use installments, so any change to terms affects the majority of revenue.*
*5. Track delays against reviews: monitor whether late orders pull review scores down, and alert on rising late rates.*

*FOOTNOTE*

*Revenue = sum of item price across all order statuses. Late = delivered after the estimated date. Order counts are distinct orders.*
